

EASY SAMPLING

RAS Sophisticated sampling solutions

The **RAS ES-VG-201** is of a high-performing direct injection vaporizer and designed for customers which requires reliable liquid vaporization. An unique system for loading liquids direct from a cylinder into the system and direct into the analyser.

Technical Specifications:

Injection: Direct from the cylinder in a special holder.
Samples: Propane, butane LPG etc.
Operation: Manually
Gas utility : N2 or He
Operating: inlet max. 100 bar
Outlet atmospheric
Operating T.: Max. 260°C. temperature controlled
Flow : Adjustable with needle valve and flow indicator
Ambient temp.: 20 to 65°C.
Power: 250VAC 500 Watt
Instr. Utility: Digital temp. indication, temp. set
Output: 4-20 mA
Fittings: 1/4" or 6 mm OD compression type fittings
Internal tubing: Stainless Steel 316
Cabinet: 19 inch table or wall mounted
