

EASY SAMPLING

RAS Sophisticated sampling solutions

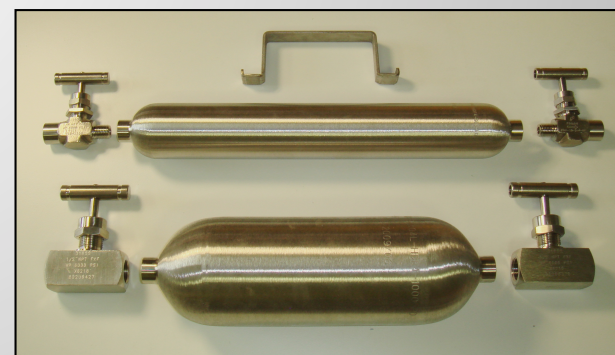

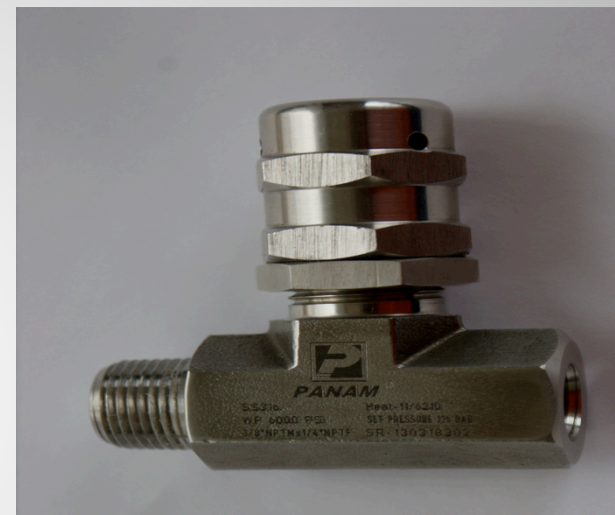

RAS sampling Solutions – Special relieve valve for sample cylinders

The relieve valve is developed for safety purposes during sampling and transport of sample cylinders.

Normally a rupture disk is used for safety which is in reality not safe.

PANAM Relieve valve

Material: Stainless Steel 316
Design pressure: 450 bar
Relieve pressure: 125 bar
Options relieve press.: 100,150 bar
Connection: Cylinder conn: 1/4" NPT M
Connection: Valve: 1/4" NPT FM
